

## *“BVB” - Buried Vehicle Barrier*

*A vehicle barrier which withstands light and heavy vehicles crashing into a controlled area.*

*This vehicle barrier has been approved by security experts worldwide.*

*The advantages of this barrier are:*

- It is heavily built, operated by a hydraulic pump, and its opening and closing times are 2 to 4 seconds.
- It withstands loaded cars and pick-up trucks weighing 5,500 pounds (lbs.) at a speed of 55 mph., and loaded trucks weighing 24,000 pounds (lbs.) at a speed of 40 mph.
- It is designed to be installed in a concrete pit, and takes a very short time to bring to operation.
- It can be supplied in widths between 2.5 to 4.0 meters and can be operated by hand if there is a power cut.

*Applications:*

- Secured parking lots ■ Airports ■ Harbors ■ Government buildings ■ Army bases
- Power plants ■ Industrial zones ■ Any controlled compound
