

MAXI SIZE POLYARMOR UHMW-PE ARMOR PANELS

We are proud with its newly installed computerized molding and monitoring equipment, which expanded its production capability of extremely large size UHMW-PE panels for lightweight armor application. **We** now offer high quality armor panel in “Maxi – Size” dimensions up to:

Width – 1.30 meters (51 inches) Length – 2.40 meters (95 inches)

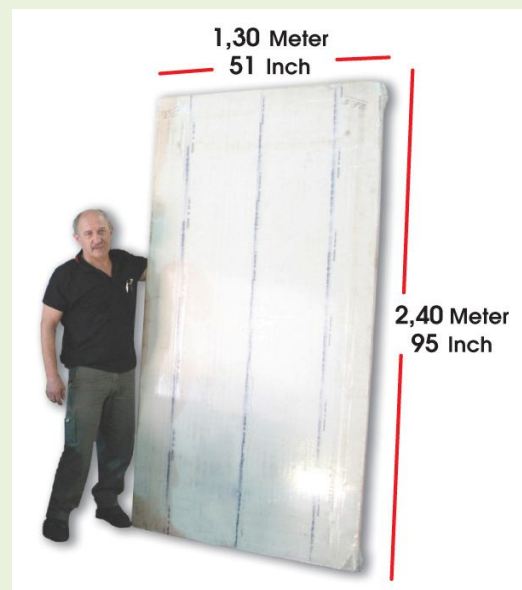

These huge panels are unique in the world marketplace. It minimizes the necessity of Armor overlapping, saves installation and labor cost, provides significant reduction in waste and increases armor reliability in armored vehicles, aircrafts and ships.

Features of the **POLYARMOR** plate:

- Excellent ballistic resistance
IAW NIJ-STD-0108.01
Threat Level III.
- Multiple hit capability.
- Robust structural strength.
- UV and Salt Water resistant.
- Weight- less than 18 Kg/Sqm.
- Naturally Buoyant

POLYARMOR is manufactured to the highest quality standards, an ISO 9001 certified factory.

POLYARMOR is widely used in armoring:

Armored Vehicles

Vessels

Aircrafts
