5- Tactical medical solutions to the Military, Law Enforcement and Security teams.

With a growing need of tactical medical care, our partner was established in order to supply custom made medical solutions to its clients regarding their special needs and challenges. Having served in the Israeli Special Forces, and while holding vast knowledge in the Close Protection field our Paramedics gained unprecedented experience in tactical medical treatment and worldwide training.

The personnel proven experience includes:

- Providing medical consulting to various organizations
- Conducting worldwide training in tactical medicine
- Special Forces Training, SWAT Training, Close Protection Training and Advanced medical Team Training
- Supplying Medical Equipment to the military, Governmental bodies, Police Forces and Multinational Companies.
- Leading Complex Medical projects in Israel and Abroad
- Establishing Medical Units, Special Forces Unit and other Units
- Supplying medical escorting and Close Protection (CP) to Multinational Corporate Executives, Celebrities and High Net Worth Individuals

Our Approach

We use unique scenario-based simulation programs. With the growing demand to train under real combat scenarios, our instructors will customize the simulated scenario to the specific needs of each client.

The instructors use only state-of-the-art equipment and simulation kits, in accordance with TCCC protocols and in addition to their own individual experience from international Special Ops, Close Protection Operations and Medical Operations. With proper training, survivability can improve up to 20%. in addition, trainees' will improve their confidence while treating real injuries that may be encountered in the battlefield.

7- **The Counter-Terrorism Studies Program**

**Program Content**

- **The Counter-Terrorism Studies Program**

Combines academic study, simulations, workshops and on-site briefings. The courses provide concentrated, in-depth exposure to the phenomenon of modern terrorism and its characteristics, modus operandi, scope and dissemination throughout the world. In addition, participants will obtain an understanding of the challenge this phenomenon presents to decision makers, security establishments, first responders and the business sector, based on the experience Israel has accumulated in the field. Circumstances have forced Israel to develop sophisticated counter-terrorism strategies and techniques and to amass extensive knowledge regarding terrorism. The program will allow participants from around the globe to benefit from Israel’s experience and advanced international counter-terrorism efforts. (Independent, state-sponsors of terrorism, charitable organizations, funds, crime). The course will also examine financing from the viewpoint of the terror organizations – religious law authorization and fundraising efforts in a hostile and changing environment (the counter-financing campaign). Also presentation of test cases and their analysis – Hezbollah, Global Jihad.

- **Fourth Generation Warfare**

As warfare between states is gradually superseded by warfare between governments and non-state actors, the nature of warfare itself is changing. This shift is accompanied by the growing provenance and effectiveness of terrorism as a method of resolving political conflicts. This course will deal with three aspects of the shift of conflict from the military sphere to the home front-intelligence gathering, counter-radicalization, and home-front preparedness. The course will examine the development of terrorism in information space and how the counter-terrorism community can exploit the terrorist presence in cyberspace for intelligence operations.
Counter-Terrorism (CT) Issues and Challenges for Homeland Security

The course will deal with current and future trends and patterns in terrorism, as well as levels of cooperation between police, military and civilian agencies, intelligence analysis and dissemination, preparing for CBRN terrorism and terrorist exploitation of the internet and other media.

Eleven Years Following the 9/11 Attacks: Where do we stand? What needs to be done?

This course examines the nexus of terrorism, counterterrorism and homeland security. It is intended to acquaint students with the dynamics, policy options, and challenges involved in countering terrorism and defending the homeland and by doing so, to establish a solid foundation upon which further expertise can be built.

The course will include among others, the following issues: “Where do we Stand against Al Qaeda, 11 Years Following the 9/11 Attacks”, “Do-It-Yourself Terrorism: Countering Homegrown Terrorism in the United States and Europe”, “Dilemmas in Homeland Security Policy: Transportation, Aviation and Maritime Terrorism” and “Post-Modern Terrorism: Assessing the Threat of Nuclear Terrorism”.

8- Other Academic Courses

- Modern Terrorism and Counter-Terrorism Strategies

The course will explore the phenomena of modern and post-modern terrorism, including definitions, the connections between terrorism, media and public opinion, and specific modus operandi, such as suicide terrorism and non-conventional terrorism. It will also include: intelligence, offensive and defensive measures, deterrence, punitive and legal measures and international cooperation.

- Terrorist Groups and Radicalization

The course is composed of two modules. The first module will examine the life cycle and nature of
terrorist groups. Topics include terrorist group origin and decline, group structure and logistics, recruitment, training, tactics, and innovation. The module employs both theoretical and case study approaches. The second module examines terrorist threats and challenges by exploring the phenomena and threats of modern radicalization processes within Muslim communities and examining the use of ideological, educational and social aspects of radical Islam for the recruitment and support of terrorist jihad organizations.

- Financing Terrorism - The Threat and the Response

The course will deal with the financing of terror organizations and Global Jihad in three parts:

- The nature of the threat and the sources of financing
